

OUTPERFORMS all existing film
lettering machines combined!

Photo

Typositor
® *the visual compositor*

Photo Typositor

RAPIDLY COMPOSES
HEADINGS, CAPTIONS AND SUB-HEADS.

IT ENLARGES 2x UP AND REDUCES 4x DOWN FROM A
SINGLE BASIC FILM FONT THAT COSTS ONLY \$15.00!

● The Photo Typositor is a modern, compact, photographic compositor that combines the best characteristics of all the present film lettering machines with many features that are entirely new, revolutionary, and exciting!

Operation of the Photo Typositor is completely visible, electronically timed, electrically controlled, and effortless.

It eliminates the blind mechanical operation and regimented spacing of existing machines by substituting an ingenious photographic optical viewing system that functions even in daylight.

What's more, a completely visible developing chamber develops each letter individually and instantly as it is exposed. You see every letter, every space, every word in the viewing chamber as you compose.

A motorized scaling system adjusts to any pre-determined size to permit you to enlarge or reduce letters as you compose them—right in the machine—without the need of photostats.

Perfect connections and artistic feeling in

spacing can be achieved, even with fine Spencerian Scripts.

Many unusual lettering effects (some illustrated in this brochure) are easily produced in a single operation, on a single strip of paper, right in the machine, in a matter of minutes, achieving results never before possible without using photostats, photography and expensive artwork.

Average composing time is approximately 2 seconds per letter.

The average cost per word is less than 1¢.

The average 3-word line can be printed on 6" of paper.

The operator sits at his work, more relaxed, more confident, because what he is composing is under his complete visual and mechanical control.

No other film lettering machine is like the Photo Typositor!! No other film lettering machine can do what the Photo Typositor does!! It has no equal—no counterpart—it is unique!

To see it is to believe it!

Photo
Typositor® PRODUCES NEGATIVES
 OR POSITIVES ON PAPER OR FILM

PAPER: Maximum economy for producing complete ads for photo off-set, display and newspaper heads production, etc.

FILM: An ideal medium for producing type and lettering for photo silk screen stencils, television program and motion picture trailers, telops, overlays and sales presentations.

NEGATIVES: The finished film and paper positives can be easily reversed into negative form with a "moditone" available at extra cost.

LAYOUTS: The Photo Typositor projects directly over a layout enabling an operator to modify each letter to fit the proportions required.

MODIFICATION LENSES ARE AN INTEGRAL PART OF THE

Photo
Typositor
 ®

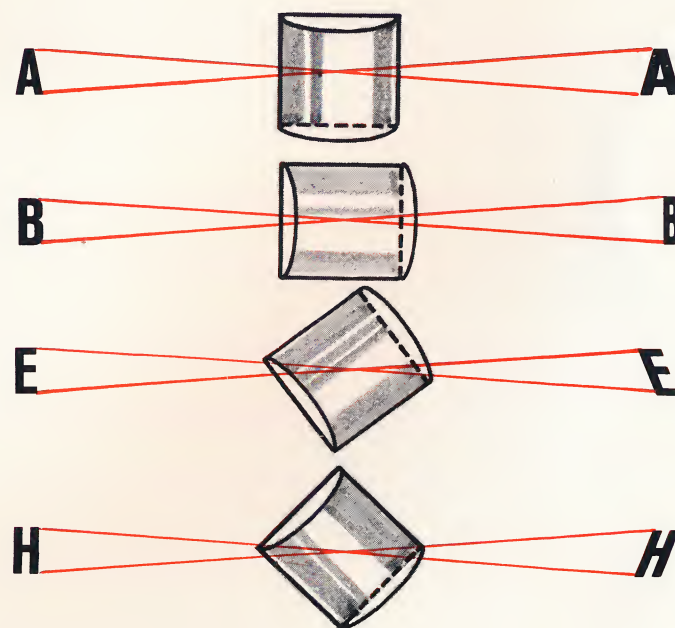

MANY FOUNDRY TYPE FACES are not available in *oblique* or *italics*. The Photo Typositor can backslant or italicize any type face film font, or hand lettered style, to varying degrees of slant.

A VIEWING PLATE is included with the equipment for determining the exact amount of slant prior to composing.

THE MODIFICATION LENSES supplied with the Photo Typositor add to the versatility of the machine.

Condense, expand, heighten or shorten any letter, as you desire. Hold one dimension while changing the other.

Exact percentages of reproportioning can be predetermined. The Photo Typositor Operating Guide gives complete details of procedures to follow in the use of modification lenses for all degrees of reproportioning.

SETS *Perfectly Connected Scripts* EVERY TIME!

The unique viewing system of The Photo Typositor eliminates the blind mechanical operation and regimented spacing of existing machines.

IT LETS YOU SEE EVERY LETTER, every space, every ascender, every descender, every connection, every interlock, every overlap, every word...every step of the way.

NO "CODES" ARE NEEDED for guidance. No mechanical skill is called for in joining letters, and no touch-ups are required after setting.

OVER 88 STYLES of hand-lettered scripts are available from our master font library now. Additional designs are being processed and will be added from time to time.

MANY STYLES have ligature combinations and a choice of vowels.

THE PHOTO TYPOSITOR functions from all 2" standard, custom or private film alphabets, or from film strips of any black and white art. Whatever the size of the letters on film negatives, you can enlarge them to twice size, or reduce them to 1/4 size or any fraction in between. The machine sets from approximately 9 pt up to 144 pt—1/8" up to 1 7/8". You can get thousands of variations in sizes, proportions and slants, from a single basic Photo Typositor film font that sells for only \$15.00...and it can be used indefinitely.

(a). The Photo Typositor enlarges and reduces to 175 size settings. (b). Condenses and expands each to 4 varying proportions.

(c). Backslants and italicizes each to 4 varying degrees of slant.

Photo Typositor

COMPOSES ENTIRE ADVERTISEMENTS
AND NEWSPAPER HEADINGS...**RAPIDLY!**

Any member of your staff can be taught to operate it efficiently and effectively in just a few hours. The Photo Typositor saves much time and money in composing display material for reproduction. Copy changes can be rapidly composed, and, if required, any style of lettering may be modified in proportion, size or slant to fit a given area. The flexibility and speed of the Photo Typositor makes it especially effective for the production of captions and sub-heads for any printing process.

A REVIEW OF *Photo* **Typositor** INNOVATIONS

1. Calibrated percentage scales.
2. Enlarges and reduces to 175 different size settings.
3. 2800 variations in sizes, proportions and slants from a single font that costs only \$15.00.
4. Condenses or expands to four varying proportions. Back-slants or italicizes to four varying angles.
5. Sets type to height, width, proportion and slant without the need for photostats.
6. Letters can be interlocked, overlapped, exaggerated, distorted, angled or spaced.
7. A single emblem or design can be repeated into borders, scrolls, or on background tints.
8. Letters can be stepped up or stepped down in facsimile or perspective.
9. Benday shadows can be cast in any direction, or entire letters can be screened.
10. Connects all scripts perfectly.
11. Combines & aligns combinations of type from varying fonts.
12. Reduces to $\frac{1}{8}$ " and enlarges to $1\frac{3}{8}$ ".
13. Produces lettering in positive or negative form on acetate, film, or paper. (With reversal kit, available at extra cost.)
14. Sets multiple lines on a single strip of paper or film.
15. Operates with or without viewing magnification.
16. Can produce complete circles directly over a layout in a yellow lit room.
17. Has preset stops for uniform bounce, stagger or curving.
18. Accepts all existing 2-inch film reels.
19. A pica graph plate is included for viewing letters directly over a layout.
20. Over five hundred fonts available from our master library.
21. No chemicals to mix. All solutions are concentrated liquids.
22. An average operator can produce several hundred dollars worth of lettering in one day.
23. Average cost of all materials is approximately 2¢ per word.
24. Complete instructions given to any member of your staff.
25. The machine includes two film fonts, photographic paper, processing materials and all accessories. *There are no hidden extras.*

Mr. T. Nelson
Box 32
Schooleys Mt., New Jersey

Dear Mr. Nelson:

Thank you for your recent inquiry concerning the Photo Typositor and enclosed you will find the information which you requested.

In order to fully appreciate the many precedent shattering advantages the machine has to offer, you are invited to view a demonstration at this office or on your own premises.

If you will be good enough to contact the writer we will arrange an appointment at your convenience.

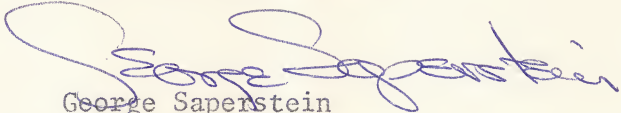

The equipment is also available on a lease basis. The lease period, at the purchaser's option, can be from 40 to 65 months in length. The payments vary from approximately \$79.00 to \$55.00 per month depending on the length of the lease. At the end of the lease period the customer can purchase the equipment for a nominal payment.

You will be truly amazed at the Photo Typositor. It can do more for you than all the other film lettering machines combined.

You are assured of our cooperation and we look forward to the pleasure of serving you in the future.

Very truly yours,

PHOTO TYPOSITOR, INC.

THE AUTOMATIC SPACER

(OPTIONAL EQUIPMENT)

The Automatic Spacer on the all-new Photo Typositor permits setting to accurate pre-selected letter and word spacing. With this new device an operator can control any amount of space, in points or picas, between letters and words, by just setting a dial. No color coding, blind-setting or memorizing is required. The Space Selector not only spaces letters properly and uniformly, but also kerns letters such as "WAV", etc., allows instant adjustments of any letter combinations—and you see what you set as you set it.
